Export & Quality:

Today, ALVITA Pharma Pvt. Ltd. is providing a ceaseless supply of the finest-quality finished formulations and can supply to markets in every corner of the world. Our global presence was built on a strong foundation of mutual respect: Respect for cultural and social diversity and respect for globally shared values.

We produce various dosage forms encompassing a vast range of therapeutic categories. Our formulation development team and regulatory department are focused on bringing latest generics to our markets with expedience thereby guaranteeing a constant flow of the latest products to our customers.

Our Regulatory team consists of elite, highly qualified personnel engaged in providing data required to assure the high Quality, efficacy and safety of our Products.

We understand that delivering pharmaceutical products must be undertaken with a great deal of care and attention. Raw materials awaiting processing and finished products awaiting dispatch are stored in modern, fully climate-controlled high-bay storage areas. ALVITA is able to meet the delivery needs of its customers thanks to its modern data and order processing systems, its inspections of all goods entering and leaving the factory, and the latest transport logistics (road, sea or air). No matter what route a ALVITA product takes, or how long it takes to get there, its journey is carefully monitored until it reaches its destination.

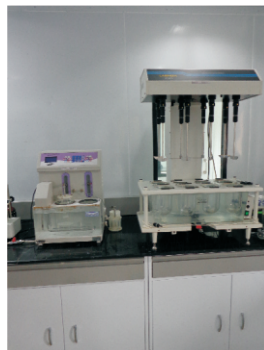

In a nutshell, the factors that have made us successful in drug manufacturing for overseas markets are:

- Highest quality products.
- Flexible and responsive service.
- "Just In time" delivery approach.
- Competitive pricing.
- Excellent compliance record.
- Efficient technical transfers.
- Modern GMP / WHO Certified facilities.
- Strong and Reliable Regulatory support.
- Efficient inventory and Logistics coverage
